Software Engineer	Front-End Developer	Front-End a11y Dev	Director of WebTec	Junior Developer

Projects & Experience

- Used **Svelte** to create a **VS Code extension** that connected to Figma's API in aid of automating page building.

- Used **Angular** to create **reusable components** to be used in a form generator.

- Regularly met and **worked directly with** the Design and Business teams to solidify a seamless pipeline between concept and execution.

- Led the initiative to design and implement a **Digital Design Language** for the application at hand.

- Upgraded Angular version, and codebase, to enhance company's **SaaS** platform.

- **Mentored** numerous developers to bring them up to speed on teams' best practices.

- Used Angular to **create a webpage builder** that cut time-to-live for new marketing pages in half.

- Updated pages and applications with Angular and a focus on **Web Accessibility**.

- Worked **directly with many different clients** to update and add new features to their many different websites.

Tech Toolbox

- Angular 4-15
- Svelte
- TypeScript/JavaScript
- SCSS/CSS
- C#
- SQL
